

# Fence Post Brackets

PART NO.  
BR-200

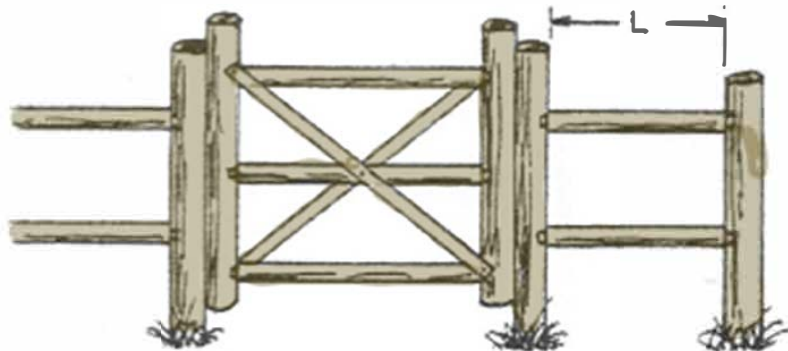

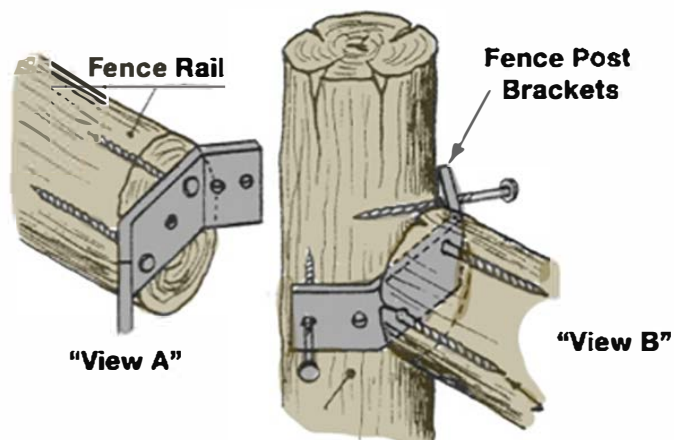

Post 5"-8" (Round)  
Rails 4"-6" (Round)

Pole Type Fence Construction

- **No Notching Required**  
Stronger Post - Stronger Fence.
- **Install Rails in Minutes**
- **No Special Tools**  
Hammer and Saw do the job.
- **Rail spacing and length as desired**

## Installation Instructions for *Instant Fence Post Brackets*

- Cut fence rails to match length of space "L" between fence posts, as illustrated. Using spiral or ring shank nails, attach fence post brackets to ends of rails as illustrated, View "A". Two or three nails may be used as best suited.
- Attach fence rails by nailing extended flange portions of brackets to posts as illustrated, View "B". When necessary, bend flange ends toward post surface with hammer to attain a closer fit.

NOTE: Ascertain that posts and rails to be used measure within size recommendations.  
Spiral or ring shank nails are recommended for optimum installation results.
